

# Minimize Costs. Maximize Uptime.

- For Chain Businesses

*We rely on EKEDC and generator across our branches **but this is no longer sustainable. Nearly overnight, the cost of NEPA and fuel have doubled! I need to find the cheapest way to power our branches!***

Executive, Chain Business

**Chain businesses face unique and daunting energy challenges.**

Managing energy across multiple locations adds a layer of complexity that single-location businesses simply don't have to contend with.

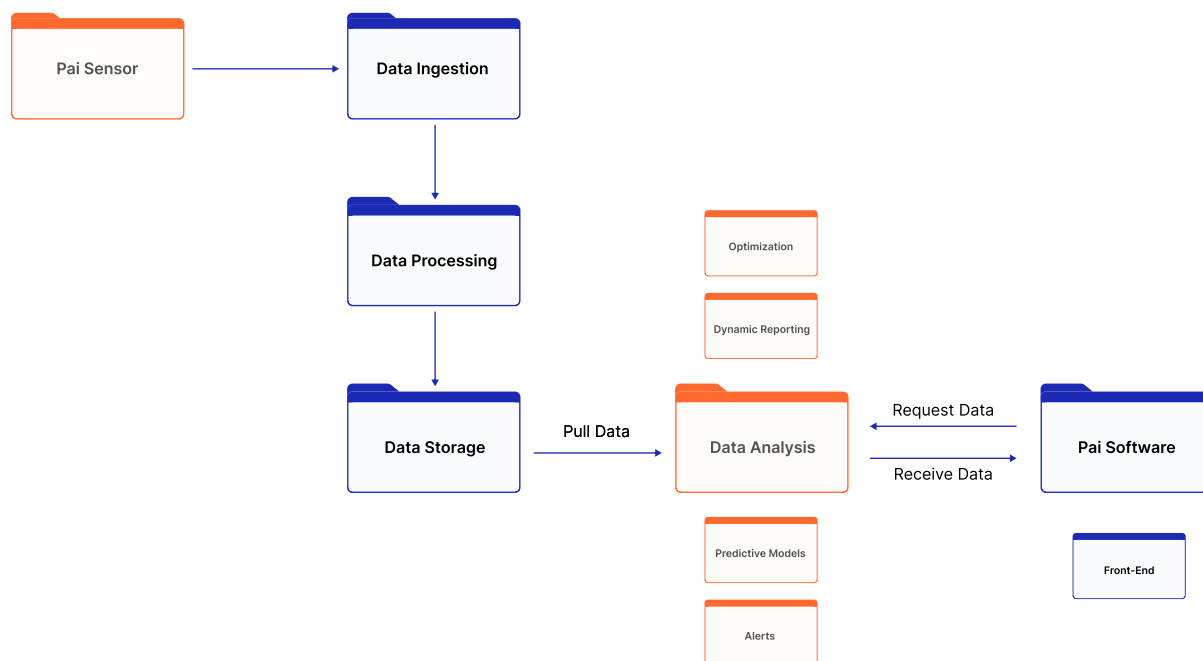

The constant struggle of inconsistent power, unreliable generators, and the ever-rising costs of petrol/diesel and electricity tariffs are amplified when replicated across an entire network of stores, restaurants, or branches.

## How can Pai Help?

- ✓ Catch and prevent fuel (diesel, petrol, etc..) fraud before it impacts your bottom line.
- ✓ Spot energy issues before they cause losses.
- ✓ Easily see and manage all your power sources in one simple dashboard.
- ✓ Size your power systems just right to avoid waste and prevent outages.
- ✓ Get real-time, accurate energy data to manage power smarter.
- ✓ Automatically switch between different energy sources in real time to keep operations running smoothly and efficiently.

## How it works

Pai is an **AI-powered energy management and control platform** that helps you spend less on operating your power supply sources while maintaining the maximum uptime needed to sustain and grow your operations. Using real-time and historical data, **Pai predicts power events to reduce costs (e.g outages, surges, anomalies), optimizes your power supply mix, and automatically switches between different power sources for uninterrupted operations**

### Consistent Power Across Every Location

From grid to generator to battery and many other sources, Pai shows which source is running your stores in real time so operations stay smooth everywhere.

### Power Systems Built to Fit Your Scale

Whether you run ten outlets or a hundred, Pai uses actual load data to right size your backup so you avoid overspending and downtime.

### Cut Waste Before It Cuts Margins

Lighting and cooling left on after hours or equipment running idle? Pai spots the drains and tells you where to save.

### Stay Alert, Stay Open

If power shifts or voltage dips, Pai alerts you instantly so your stores keep serving customers without disruption.
